Profile

Experienced researcher and consultant in sustainability and the circular economy. Specialized in guiding businesses with their measurement journey, using methods such as life cycle assessment (LCA) and social sustainability metrics. Working with cross-cultural teams in transdisciplinary environments. Key interest: to bridge scientific and practical knowledge to advance the transition to sustainable development.

Experience

Roos Sustainability Research

April 2022 - Present

- Self-employed. Project with Footprints Africa, the University of Amsterdam, Utrecht University, ICLEI, PRE Consultancy.
- Focus of my work: developing circular economy and sustainability support mechanisms for businesses
- Keywords: sustainability metrics | methodology development | grant writing | knowledge transfer | monetary valuation | trainings | thesis supervision

Subject matter expert, University of Messina

April 2022 - Present

- Topic expert on sustainability management.
- Tasks: supervising master students and preparing guest lectures on circular economy. Writing scientific articles on circular economy related topics.

PhD researcher, University of Messina (Italy)
